TECHNICAL SUMMARY

- **Architecture:** Lucid, Mermaid, Excalidraw, Miro, C4, Xmind
- **Design:** Balsamiq Mockup, Figma, Prototyping, and Best Practices for UI/UX
- **Development:** React, Next.js, TypeScript, Tailwind, Node.js, Express, Laravel
- **APIs:** REST, GraphQL, Webhooks, Gateways, Microservices
- **Testing:** Playwright, Cypress, Jest, Vitest, k6, Selenium, Postman, Percey, BrowserStack
- **Deployment:** AWS, Vercel, Cloudflare, Docker, GitHub Actions, Terraform, Kubernetes, Linux, Nginx
- **Security:** Auth0, IAM, WAF, OWASP, Burp, Dependabot, Secret Manager, Zero Trust
- **Reliability:** Multi-Region, Failover, Autoscaling, Load Balancing, Health Checks
- **Performance:** Lighthouse, Web Vitals, Redis, Cube Store, CloudFront, Route53, Global Accelerator
- **Observability:** CloudWatch, Datadog, Sentry, Tracing, Metrics, Alerting
- **Data:** PostgreSQL, MySQL, DynamoDB, RDS, Supabase, Snowflake, BigQuery, ETL
- **Automation:** n8n, Zapier, Webhooks, IFTTT, Alexa, SmartThings, IoT devices
- **AI:** Context Engineering, Vector Search, RAG, Fine-Tuning, Evaluation, Optimization
- **Agentic:** Skills, Loop, MCP Servers, A2A Protocol, Multi-Agent Orchestration

EXPERIENCES

Senior Full Stack Web Developer & Architect / Thryv / Dallas, TX

(1/23-present)

- Lead engineering across backend and frontend, driving technical direction, code quality, and on-time feature delivery.
- Ensure delivery through strong ownership, accountability, and proactive risk identification across sprint cycles.
- Built a **custom dashboard** tracking team velocity, deployments, releases, and sprint progress in real time.
- Built an **AI code reviewer** that audits every open PR for security, performance, correctness, scalability, and team standards, then ranks findings and stages the top comments for approval.
- Built an **AI deploy assistant** that guides stage and production releases and enforcing sign-off gates.
- Automated testing operations by **smart-split** the tester queue with self-test guards and weekly load balancing.
- Built an **AI codebase auditor** that reverse-engineers any repo into one clean HTML report.
- Built a note-taking app with full API, **MCP**, and CLI integration for any content types like HTML, MD or TXT.
- Build an Automations app that connected with Youtube, Gmail, Slack, and my other dev tools that I've built
- Designs **architectures** and documents system workflows to meet business objectives.
- Leads the integration of web/mobile **authentication** with Auth0 across all Thryv applications.
- Coordinates with Thryv developers to ensure **accurate data flows** through Tealium to Heap and Pendo.
- **Leads** technical meetings with external engineering teams (Tealium, Heap, Pendo, Sigma, CommandAI).
- Architects and **develops** the Advanced Campaign Editor (ACE) react application for the Thryv Business Center Team.
- Builds **back-end APIs** using Node.js, Express.js to support CRUD operations, including Amazon S3 integration.
- Creates detailed **documentation** with diagrams, code snippets, and step-by-step guides for the team.
- Provides support to developers during and after implementation to resolve any technical questions.
- Develops a model **checklist** for performance, security, and reliability across all Thryv centers.
- Built a **mindmaps** app for project planning and brainstorming with paste, local AI posting, and built-in AI generation.
- Built a suite of developer tools: device frames, icon generator, URL-param detector, hex converter, JSON parser, web drop, PDF-to-images, and more.

Senior Web Developer / Monitaur.ai / Danbury, MA

(07/22-12/22)

- Contribute to the design, architecture, and development of Monitaur core web applications
- Make architectural front-end changes and own implement them using Vue.js (v2 & v3)
- Write tests and contribute to ongoing automation infrastructure development
- Patch Security Vulnerabilities based on the Pentest report
- Integrate Datadog logging with Django & Vue.js applications

Senior Full Stack Web Developer / Benu Networks, Inc. / Billerica, MA

(10/15-06/22)

- Work explicitly with MVC Frameworks: Laravel 8.
- Planning and implementing web projects to meet the needs of the organization
- Develop complex applications using the appropriate approach and technology
- Build Admin, MHN portal, and release to Telus in Canada
- Build Microservices using Node.js and integrate with Fortinet Security for Telenet, Belgium
- Build Admin, MBN, SMB, and CarWash portals for Telenet, Belgium
- Build Admin, NetOS, BOSS, and Operation portal for Comcast, US, Telecentre S.A. in Argentina
- Build an iOS app that manages home network and profiles for Liberty Global in the UK
- Integrate OpenID Connect with the user portal for MBN and SAML 2.0 with the admin portal for MBN, SMB, and MHN
- Led the Facebook Wi-Fi project and worked closely with the Facebook Wi-Fi team to get Benu Networks Certified
- Contribute to re-design and developing Benu networks enterprise portal using React

EDUCATION & CERTIFICATIONS

Bachelor of Science in **Computer Science** / University of Massachusetts of Lowell / Lowell, MA

(2014)

AWS Certified Cloud Practitioner- Issued: January **2025**

AWS Certified **Solutions Architect** – Associate - Issued: January **2025**

AWS Certified **Developer** – Associate - Issued: January **2025**

CompTIA **PenTest+** Certification - Issued: May 2020

Certified Ethical Hacker (CEH) Certification - Issued: March 2020
